Certification ISO 9001

SAPCI offers products with the strength necessary to withstand erosions and displacements due to the tensile forces imposed by the wave loads and the force required to withstand both the shoreline of rivers, canals and ditches. lateral displacement and vertical uplift.

## **Advantages :**

- Reduce water lost by infiltration during transport;  
Destroy weeds that consume water (20% loss water per 1.2 Km)  
et réduire leur frais d'élimination.
- Prevent damage to adjacent lands that may be saturated with water;
- Reduce drainage costs.
- Reduce the size of canals and the cost of rights of way;
- Reduce maintenance costs by preventing silt deposition in the canal (50-75%). under the effect of high speed;
- Decrease conveyed flows, and increase the irrigated area;
- Pouvoir effectuer les irrigations dans un temps plus court;
- Allow some flexibility in the channel layout;
- To reduce the danger resulting from burrowing animals;
- Réduire l'efiet de l'érosion du canal;
- Ensure the economy in workforce (about 50%).
- The decorative and aesthetic aspect of our products.
